Education

University of British Columbia — Vancouver, BC
Bachelor of Science in Computer Science — *Sep. 2023 – Present*

- Hackathon Awards: *MLH Power Up Hacks* (Most Creative Use of Twilio), *Hackdemonium* (Best Environmental Hack)

Experience

Software Development Engineer Intern — Vancouver, BC
Amazon Alexa – Java, Voice AI, Distributed Systems — *May 2026 – Aug 2026*

- Owned the end-to-end development of a voice-initiated calling feature, from natural-language interaction and technical design through implementation, testing, and device validation.
- Built production-quality Java components that coordinated multiple distributed services, with robust input validation, privacy-safe logging, and **92%+ line coverage**.
- Authored technical design documents, evaluated architectural trade-offs, and incorporated feedback from senior engineers through iterative design and code reviews.

Software Engineering Intern — Vancouver, BC
Netverge Services – Next.js, Django REST, PostgreSQL, Redis, Docker — *Apr 2025 – Aug 2025*

- Led development of an AI-powered dashboard for Managed Service Providers (**300+ clients**), featuring real-time reports and a multi-agent LLM system that predicts incidents and orchestrates automated resolutions.
- Optimized the Next.js + Django API layer, reducing page-load times by **40%** by consolidating overlapping endpoint requests and implementing smart caching strategies.
- Shipped **80+ features** and bug fixes to production; automated repetitive workflows, reducing manual workload by **80%**.
- Presented the platform live at the **2025 Web Summit Tech Conference** to industry professionals, including customers, partners, and investors.

Software Developer — Vancouver, BC
UBC Visual Cognition Lab – React, MongoDB, Tailwind — *Feb. 2025 – Jan. 2026*

- Rebuilt the lab's website to improve accessibility, performance, and usability, and developed an AI assistant for exploring research.

Software Engineer — Vancouver, BC
MINT Design Team – React Native, Python, scikit-learn — *Jan. 2025 – Apr. 2026*

- Developed a hands-free mobile interface using EEG signals and iOS Switch Control for users with motor impairments.
- Built calibration and machine learning pipelines for real-time binary classification of EEG commands.

Projects [Link]

Bongo, Discord Bot - *Discord.js, Node.js, MongoDB* — *Oct 2023*

- Built a multiplayer economy game with a Discord bot, enabling in-game transactions.
- Scaled the platform to **200,000+ active users**, managing deployment and operations.

ThenStep - *Next.js, Bun, OpenStreetMap, Google Maps API, Puppeteer* — *Jan 2025*

- Developed a map application enabling natural language search for safer, scenic, and eco-friendly routes.
- Integrated OpenStreetMap and Google Maps API for dynamic and interactive mapping.
- Scraped local data with Puppeteer to enhance route variety and community-focused features.

Pinpoint - Category Guessing Game - *Next.js, Node.js, Tailwind CSS, Supabase* — *Nov 2025*

- Built and managed a category-guessing game with daily puzzles, reaching over **1,000,000 views** from **168 countries**.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, EJS, C, C++, Swift
Frameworks: React, React Native, Express.js, Next.js, Flask, Node.js, Bun, Supabase, Expo, Django
Developer Tools: Git, Docker, VS Code, Android Studio, Xcode, MongoDB, PostgreSQL, Firebase, Supabase, Vercel
Libraries & APIs: Scikit-learn, Puppeteer, Google Maps, OpenStreetMap, Twilio, bcrypt, Socket.io, Pandas
